**ACTIVITIES**

**2023**

Through my studies, I have gained a solid understanding of low-level programming. It includes the intricate workings of the shell, kernel, and operating systems.

I even had the opportunity to create the "print()" command using the C programming language.

Additionally, I have honed my skills in command-line interface, debugging using duck debugging, writing pseudocode, and designing flowcharts for algorithmic representation.

**2024**

I am enrolled in a self-paced, online Front-end Engineering diploma to enhance my development skills.

Applied as a Volunteer for International Women's Day Event organised by Google's Women Techmakers.

Content writer volunteer with a local startup - Techsavia.
